Frontend Software Engineer

Nataliia Shobotova

Software Developer with 5 years of experience in the manufacturing and banking industries as a SQL Developer, with a strong foundation in data modeling, query optimization, and translating business requirements into reliable backend logic. Transitioned into frontend development to pursue growth opportunities and build high-quality, user-focused products using JavaScript, Tailwind CSS, and React. Combined frontend and backend, giving me a natural understanding of how both sides fit together. I focus on intuitive, responsive interfaces while staying aware of the systems behind them. Seeking a frontend role with full stack growth potential, where I can contribute immediately and expand my technical impact over time.

Personal frontend projects

Driving School Website

HTML5, Tailwind CSS, Vanilla JS

- Built bilingual (NL/EN) website for a driving school in the Netherlands.
- Created responsive layout with attention on mobile-first approach.

Frontend Quiz App

React, React router, TypeScript, Tailwind CSS, GitHub pages

- Developed interactive frontend quiz with a clean dark/light mode.
- Styled a mobile-first responsive layout using Tailwind CSS.
- Hosted project on GitHub pages.

Online Store Website

Vite, React, TypeScript, Tailwind CSS, MongoDB

- Bootstrapped React/TypeScript project using frontend build tool Vite.
- Implemented product list, interactive shopping cart, personal cabinet and orders management system.
- Data persistence based on the managed MongoDB solution.

Work experience

MS SQL Developer EPAM Systems Ukraine

August 2015 - April 2018 | Ukraine

Project: Investment Bank

- Developed and optimized SQL scripts, stored procedures, and triggers for enterprise applications in the investment banking domain.
- Improved performance of high-load queries through analysis and optimization.
- Participated in debugging, unit testing, and system integration workflows.
- Collaborated with cross-functional teams and contributed to technical documentation.

System Engineer Honeywell Process Solutions

August 2010 - August 2015 | Ukraine

Projects: Arcelor Mittal Kryvyi Rih, Paper Mill (Obuhiv and Arkhangelsk)

- Configured MES (Manufacturing Execution System) solutions for industrial clients.
- Developed technical reports using SQL Reporting Services and Crystal Reports.
- Documented system configurations and provided technical guidance to customers.
- Worked closely with engineering teams to implement system improvements.

Education

National Technical University of Ukraine "Kyiv Polytechnic Institute"

Computer-integrated systems and complexes in the chemical industries

September 2004 - June 2010 | Ukraine
